

Dr. Perwaiz, 10/10/01

It has taken me a long time to write this letter. Every time I open the mail + see another bill from you, I would say that I was going to write you. This month I did. The thought of having to pay you for what you did to me makes me sick to my stomach + very mad. Dr. Perwaiz, you took advantage of the faith + trust I had in you. You made me believe that you were not only my doctor, but also a friend. A friend would have never done to me what you did. You are "laser-happy". It amazes me now to believe that I could have been so stupid to have allowed you to operate on me as you did. Then, as if that wasn't bad enough, I allowed you to perform a hysterectomy on me because you said that that was the only way to correct the problem. You lied. I regret forever allowing you to do that to me. You are a Bur. To top it all off, when I went back to you after that, you wanted to do laser surgery again! I have been told by 20 doctors that the hysterectomy was unnecessary + probably most of the laser surgeries too. When I realized what you had done, I was furious. I was told that the lining of my vagina was paper thin from all of the surgery. All I had to do was use some internal hormone cream + I was better in 2 weeks - yet you want to perform surgery again! Amazement whenever I hear of someone going to you, I tell them what you did to me + I try to talk them out of going to you. Almost every woman I have talked to who has been to you has had laser surgery - imagine that! Also, after my hysterectomy, I had trouble breathing. You + some other doctor told me it was probably just air bubbles or gas from surgery. Well, my lungs collapsed on me twice + I know from the feeling that it was what happened after the hysterectomy - yet you did nothing about it. Dr. Perwaiz, you are guilty of gross malpractice - your license should be revoked + I will find a way to do it! Because of everything you have done to me, I refuse to pay you one penny - the way I figure it, you owe me! I'm sure all of my surgeries bought you at least one or two more of the Mercedes that you are so fond of. If you insist on me paying you, I will
